Well Disinfection Disclosure

$295 for 1 hour
$100 for each additional hour if needed

** Turn off circuit breaker to well prior to chlorination

Westfair Water Systems, Inc. shall not be responsible for any malfunction that may arise at the time of disinfection or thereafter including but not limited to the list below:

- Pump failure due to any part of chlorination process (e.g. oxidation of iron clogging pump, etc.)
- Electrical failure of any kind (e.g. wires supplying pump, control box, pressure switch, etc.)
- Low water pressure or no water pressure due to chlorine circulation process in which the water table may drop in your well
- Pressure tank failure
- Zones pumps on boilers and/or heat failure
- Appliance malfunctions (washing machines, dish washers, etc.)
- Pipe deterioration or leakage
- Fixture clogging due to iron oxidation
- Well cap deteriorations including rusted screws, pins, housing

The above is not likely to happen, but please realize when you shock a well with chlorine you are disturbing an environment that is not used to being aggravated and any number of situations may arise.

I agree to the above and agree to continue with the well disinfection process.
